

MOBILITY RENTALS

We work towards a greener future!

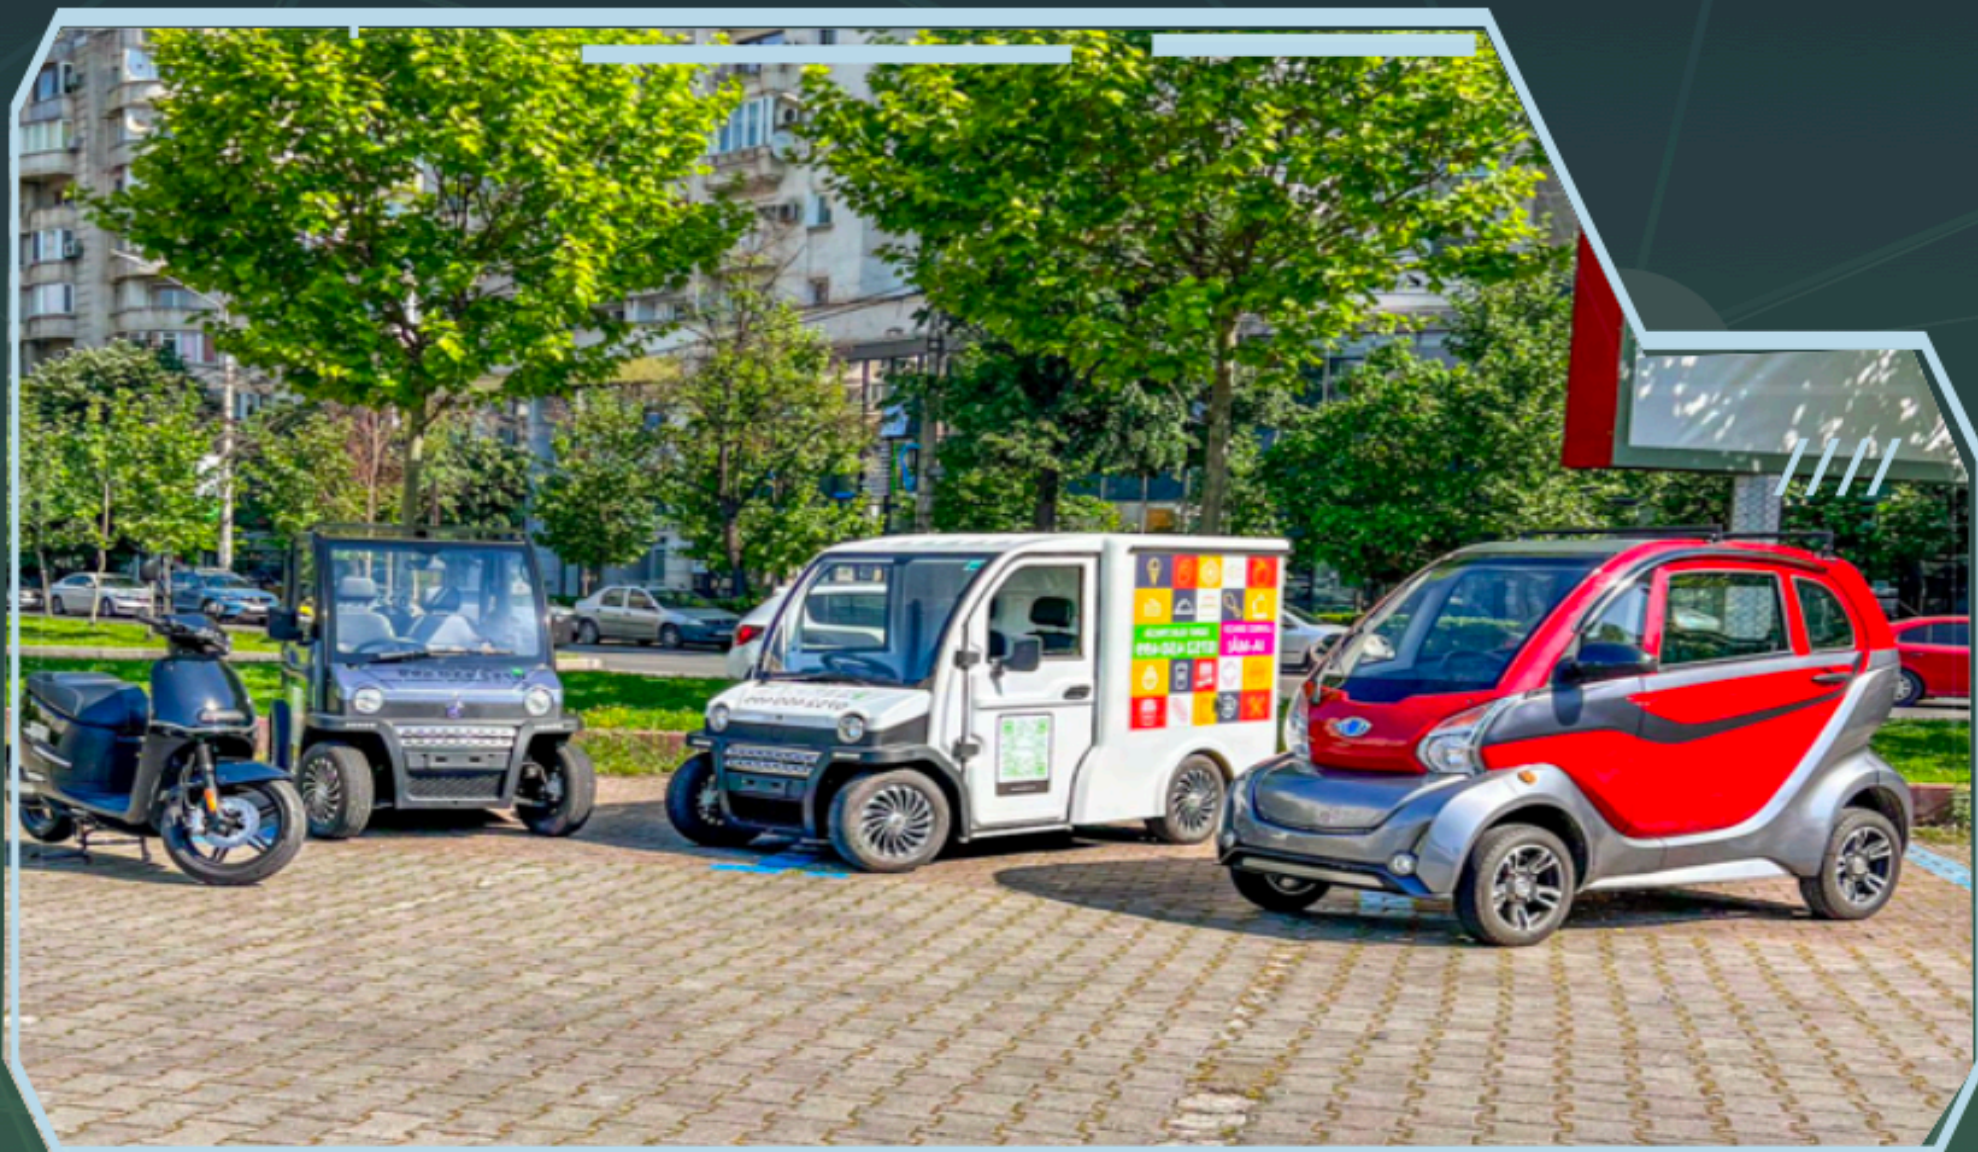

We envision giving a more sustainable environment to the future generations by growing an innovative electrical vehicle ecosystem that contributes to a clearer world!

We are on a mission. Together!

Our goal is to revolutionise urban mobility by offering electrical vehicles and infrastructure for building sustainable future businesses for greener cities and communities!

The future of urban mobility is electric: be part of it!

You have a large variety of cars and scooters to choose from! Our cars address all categories of businesses, couriers, restaurants and are also efficient for individuals who want to commute to all destinations at a low cost.

A new era in urban mobility!

E-Mobility Rentals is perfect for your Business AND for your personal transportation needs!

We aim to provide customised services that can have a major impact on business fuel costs, maintenance, carbon imprint, environmental impact and greenhouse emissions. By doing so, we strive to turn the cities into greener areas through smart traffic solutions and sustainable transportation.

We provide state-of-the-art infrastructure and easy ways to access vehicles!
Support the ecosystem and enjoy safer, cheaper and faster day by day journeys!

We provide a selection of electrical and very effective vehicles to Municipality & Local Government, Utilities and Green City Initiatives!

Cutting edge technologies!

We focused on electric cars and scooters with CATL brand battery infrastructure, similar to the one used by the giant company Tesla, for an increased autonomy of each lithium battery! ALL cars and scooters can use the same battery that is charged in the Swap Station.

Each car will have up to 3 battery slots, which is the equivalent of 250-300km and the scooters have up to 2 battery slots, which represents an autonomy of 200km.

Keep your fleet charged through modern methods: meet the E-Mobility Rentals APP!

All of the E-Mobility Rentals users will be able to access our special app, through which can be viewed the nearest Swap Station locations, where you can replace the discharged battery. The access to the locker will be made as simple as pushing a button. This whole process takes less than 30 seconds!

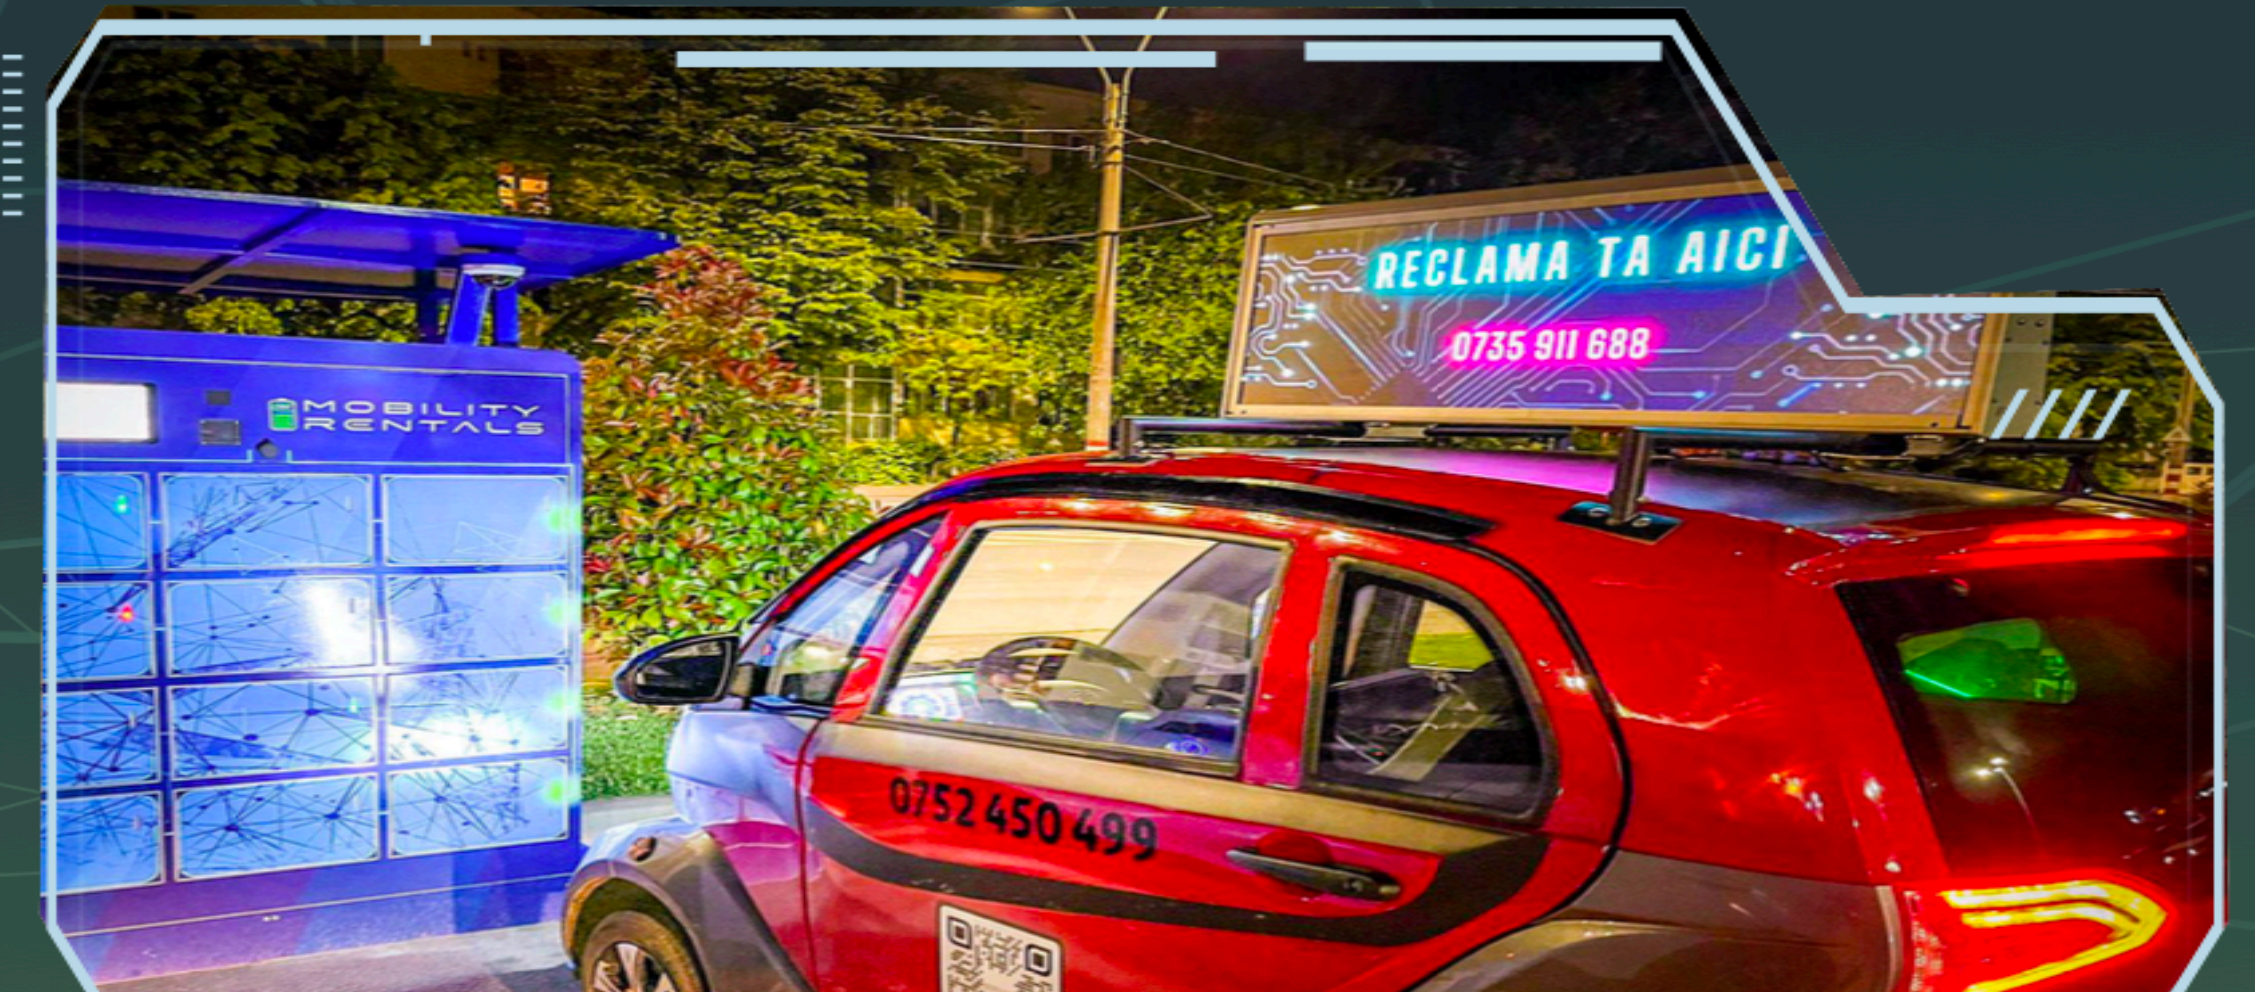

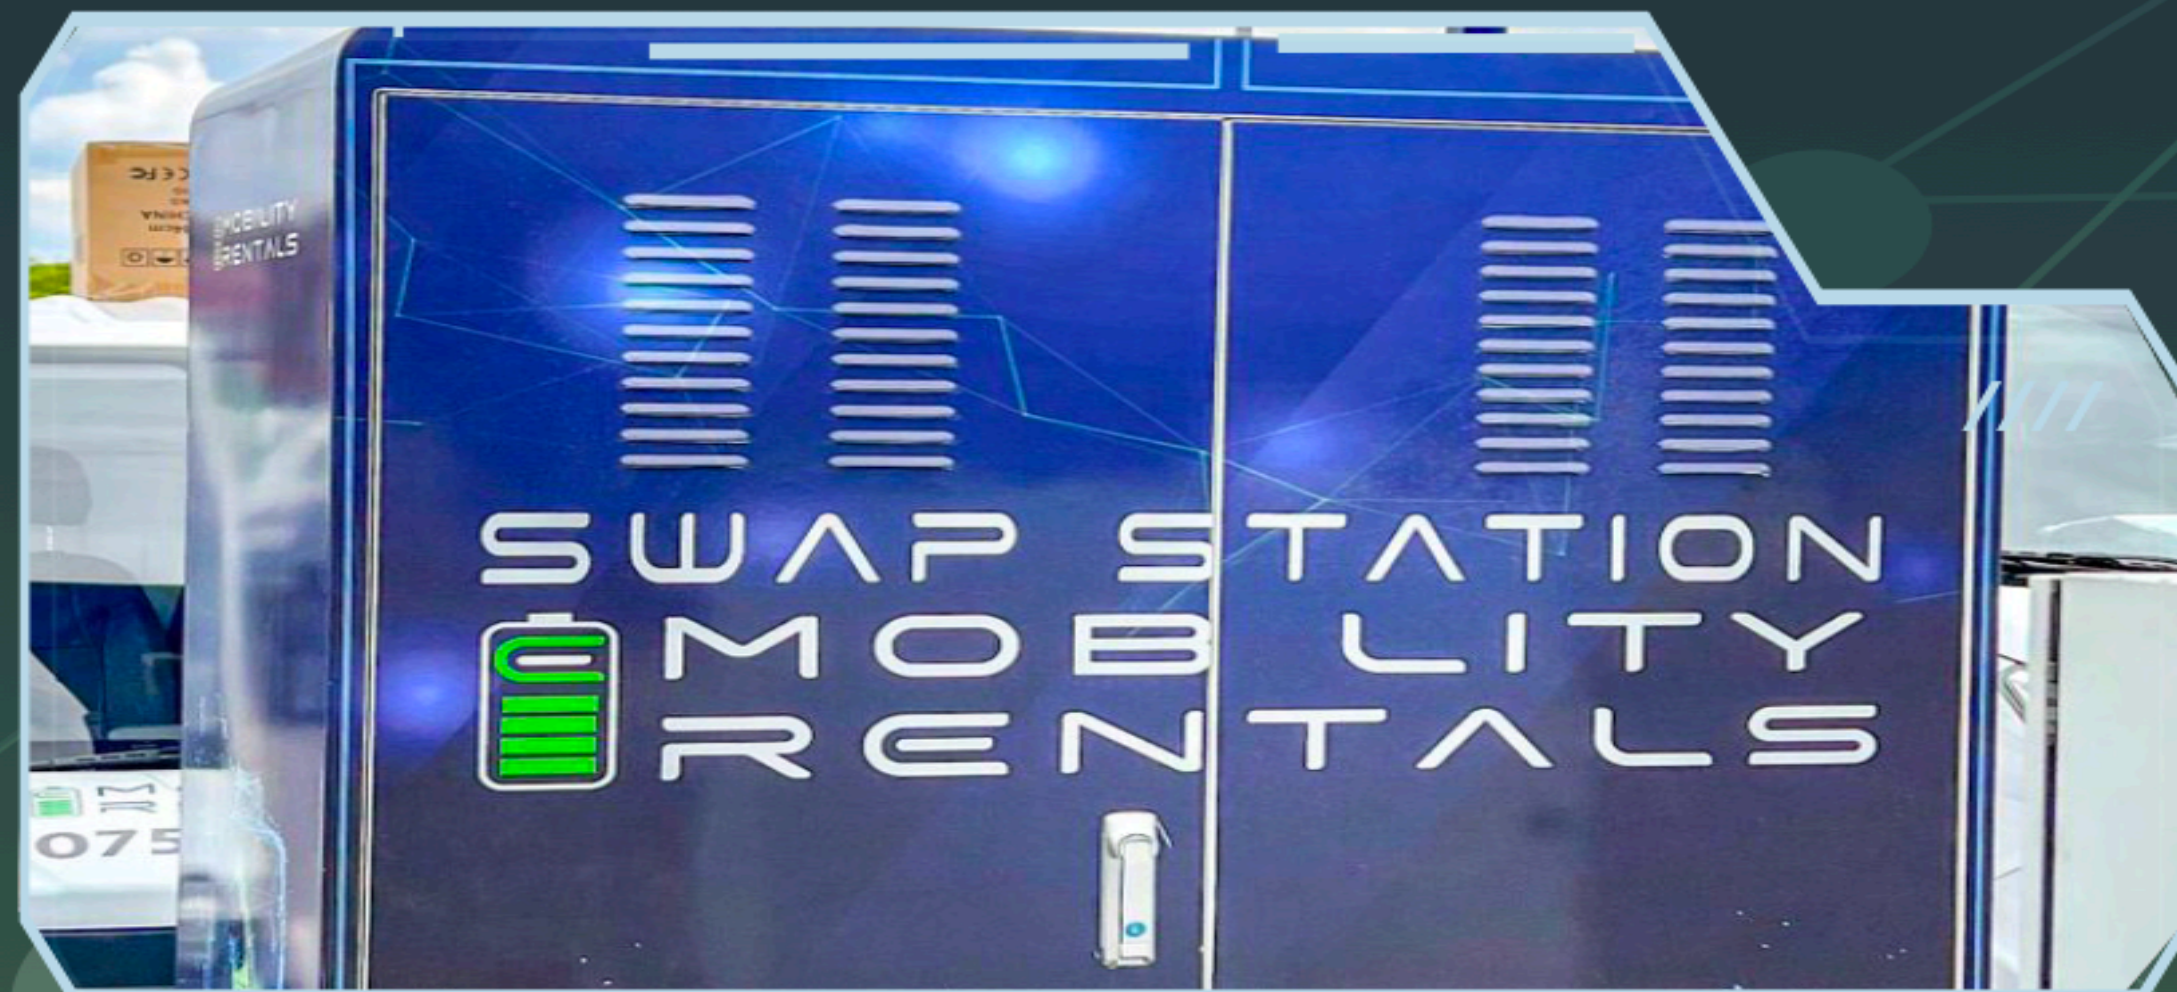

1 Smart software designed to offer an user-friendly experience

2 The batteries are kept at an optimal temperature no matter the season

3 The charging is optimised in order to keep the electricity consumption as low as possible

Here are just a couple of advantages that you enjoy once you switch to E-Mobility Rentals!

- Unlimited autonomy
- No refuel or charging costs
- Free parking
- Smart battery management
- Intelligent mobile APP
- Included maintenance
- No wasted time for charging
- Insurance coverage
- Way cheaper than the conventional transportation
- No carbon emissions or air pollution
- The market is expected to be driven by technological advancements in battery technology and charging infrastructure

Expansion plans!

We are planning to keep track of the technological updates and give our clients the most modern e-mobility conditions via our vehicles and softwares, constantly expanding the countries where you can access our system, like Spain, Germany, Benelux, UK and France!
